1. Retail costs are based on CPI-U of retail prices for domestically produced farm foods, published monthly by the Bureau of Labor Statistics (BLS). Farm value is the payment for the quantity of farm equivalent to the retail unit, less allowance for by-product. Farm values are based on prices at first point of sale, and may include marketing charges such as grading and packing for some commodities. The farm-retail spread, the difference between the retail value and farm value, represents charges for assembling, processing, transporting, and distributing. 2. Weighted-average value of retail cuts from pork and Choice yield grade 3 beef. Prices from BLS. 3. Value of wholesale (boxed beef) and wholesale cuts (pork) equivalent to 1 pound of retail cuts adjusted for transportation costs and by-product values. 4. Market value to producer for live animal equivalent to 1 lb. of retail cuts, minus value of by-products. 5. Charges for retailing and other marketing services such as wholesaling and in-city transportation. 6. Charges for livestock marketing, processing, and transportation. *Information contacts: Howard Elitzak (202) 694-5375, William F. Hahn (202) 694-5175*

The weights used for "total U.S. merchandise exports" index are based on U.S. total merchandise exports to the largest 79 trading partners. Weights are based on relative importance of major U.S. customers, competitors in world markets, and suppliers to the U.S. Indexes are subject to revisions for up to 1 year due to delayed reporting by some countries. High-value products are total agricultural exports less bulk exports. Source: Nominal exchange rates are obtained from the IMF International Financial Statistics. Exchange rates for the EU-12 are obtained from the Board of Governors of the Federal Reserve System. Full historical series are available back to January 1970 at <http://www.ers.usda.gov/data/exchangerates/>

1. A major revision to the weighting scheme and commodity definitions was completed in June 2008. This significantly altered the series from previous versions. Beginning in July 2008, the base of the series has been changed from 2000 to 2005. In addition, the composition of the commodities and commodity groups under U.S. suppliers was changed to more closely reflect the pattern of U.S. imports.

F = forecast. P = preliminary. Numbers may not add due to rounding. 1. A positive value of inventory change represents current-year production not sold by December 31. A negative value is an offset to production from prior years included in current-year sales. 2. Final sector output is the gross value of commodities and services produced within a year. Net value added is the sector's contribution to the National economy. Net farm income is farm operators' share of income from the sector's production activities. The concepts presented are consistent with those employed by the Organization for Economic Cooperation and Development (OECD). [Information contact: Timothy Park, E-mail: tapark@ers.usda.gov]

F = forecast. P = preliminary. Numbers may not add due to rounding. 1. Includes commodities placed under CCC loans and profits made on loans redeemed. 2. Government payments reflect payments made directly to all recipients in the farm sector, including landlords. The nonoperator landlords share is offset by its inclusion in rental expenses paid to these landlords and thus is not reflected in net farm income or net cash income. 3. Income from custom labor, machine hire, recreational activities, forest product sales, and other farm sources. 4. Excludes depreciation and perquisites to hired labor. 5. Excludes farm operator dwellings. 6. Value of farm products consumed on farms where produced plus the imputed rental value of farm dwellings. 1/ Includes Export Guarantee Program, Direct Export Credit Program, CCC Transfers to the General Sales Manager, Market Access (Promotion) Program, starting in FY 1991 and starting in FY 1992 the Export Guarantee Program - CreditReform, Export Enhancement Program, Dairy Export Incentive Program, & Technical Assistance to Emerging Markets, starting in FY 2000 Foreign Market Development Cooperative Program and Quality Samples Program, starting in FY 2003 Technical Assistance for Specialty Crops and starting in FY 2010 the Pilot Program for Local and Regional Food Aid. E = Estimated in FY 2012 President's Budget based on November 2010 supply and demand estimates. The CCC outlays shown for 2002-2008 include the impact of the Farm Security and Rural Investment Act of 2002, which was enacted on May 13, 2002. The CCC outlays shown for Fiscal Year 2008 though 2012 also include the impact of the Food, Conservation, and Energy Act of 2008 enacted June 18, 2008.

2/ FY 2008 through FY 2010 disaster and livestock assistance programs include the impact of \$2.4 billion of outlays authorized by P.L. 110-28, which was enacted May 25, 2007. Excluded from this table are \$3 million of outlays shown in the new Agricultural Disaster Relief Trust Fund in FY 2009, \$1.937 billion of outlays shown in FY 2010, \$1.523 billion in FY 2011, and \$1.284 billion of outlays shown in FY 2012. Minus (-) indicates a net receipt (excess of repayments or other receipts over gross outlays of funds). FY 2004 - FY 2005 includes revised dairy outlays.

Note: This table differs from Personal Consumption Expenditures (PCE), table 2, for several reasons: (1) this series includes only food, excluding alcoholic beverages and pet food which are included in PCE; (2) this series is not seasonally adjusted, whereas PCE is seasonally adjusted at annual rates; (3) this series reports sales only, but PCE includes food produced and consumed on farms and food furnished to employees; (4) this series includes all sales of meals and snacks, while PCE includes only purchases using personal funds, excluding business travel and entertainment. For a more complete discussion of the differences, see "Developing an Integrated Information System for the Food Sector," ERS Ag. Econ. Rpt.
